

# Leakage Current Tester TOS3200

Conforms to international standard IEC 60990 ("Methods of measurement of touch current and protective conductor current"). Current measurement range: DC/RMS: 30 µA to 30 mA, PEAK: 50 µA to 90 mA Seven built-in measurement circuit networks conforming to IEC 60990 and other standards. GPIB, RS-232C, and USB interfaces equipped as standard.

*Conforms to safety standards for general electrical equipment. Supports all touch current and protective conductor current (earth leakage current) tests.* 

A leakage current tester has now been added to the TOS Series... Conforms to international standard IEC 60990 ("Methods of measurement of touch current and protective conductor current").

Leakage Current Tester

The Leakage Current Tester TOS3200 is designed to perform leakage current (touch current and protective conductor current) tests on general electrical equipment but not medical electrical equipment. It enables you to conduct tests that conform to the requirements of the applicable IEC, UL, JIS, and other standards, as well as the Electrical Appliance and Material Safety Law. The memory in the main unit stores the 51 types of test conditions laid down in the IEC/JIS standards for information technology equipment, household electrical appliances, audio, video electronic apparatus, luminaires, motor-operated electric tools, and electrical equipment for measurement and control and in the Electrical Appliance and Material Safety Law, thereby enabling you to conduct standard tests with simple panel operation.

## Capable of measuring leakage current in three modes

## Touch current (TC) operating mode\*

Enables you to measure the touch current flowing between the enclosure (accessible portion) of the electrical equipment under test (EUT) and the power line incorporating the earth wire, via a human phantom circuit. For human phantom circuits, seven measurement circuit networks (NTWKs) conforming to the applicable standards are provided as standard. The switching of the polarities of the power line to the EUT, as well as single-fault conditions, are automatically set with relays inside the tester.

# Protective conductor current (PCC) operating mode\*

Enables you to measure the current flowing through the protective conductor (earth wire) by connecting the power plug (NEMA5-15 or an equivalent) of an item of 100 V electrical equipment to the socket on the front panel. A multi-outlet is available as an option (sold separately) to accommodate the different plugs used around the world.

## Meter (METER) operating mode

In the same way as an ordinary multimeter, enables you to measure voltage and current using measurement terminals A and B on the front panel. For voltage measurement, it offers a "safety extra low voltage" (SELV) detection function; for current measurement, it offers a measurement function using measurement circuit networks (NTWKs).

\* TC=Touch Current PCC=Protective Conductor Current

### Seven built-in measurement circuit networks

It offers built-in seven measurement circuit networks (NTWKs) for measuring the touch current of general electrical equipment.

#### Measurement circuit network (network A)

#### Measurement circuit network (network B)

Measurement circuit network (network C)

Measurement circuit network (network E)

#### Measurement circuit network (network F)

#### Rear panel

### Up to 30 mA for RMS measurement

Capable of measuring 30  $\mu$ A to 30 mA for DC/RMS measurement and 50  $\mu$ A to 90 mA for PEAK measurement, both in three ranges. Two range switching functions are provided, namely, a fixed range function (FIX) and auto range function (AUTO), which conform to the current to be measured.

For RMS measurement, the "true rootmean-square value" is achieved.

### Easy-to-understand operation

Simple operation is possible thanks to the intuitively understandable test condition menu and the function keys/rotary knobs.

TC 1/2 PROBE ENCPE	LOWER OFF UPPER	
POL NORM	UPPER 30.0 m	
PROBE		UPPER TIME/WAIT

NTWKA MC	DERMS	RANGE AUTO	
	ib I	Rs: 1.5 kΩ Rb: 0.5 kΩ	Cs: 0.22 µF
NTWK	MODE	RANGE	

[Setting screen for touch current (TC) measurement]

#### Enables the continuous execution of tests

Allows you to automatically conduct TC and PCC tests as a single sequence program by setting their test conditions as up to 100 independent tests (steps). You can set up to 100 sequence programs, with up to 500 steps in total.

NTWK:A MO 00 TC+EncPe-	2 PRG 00: DE:RMS ABO PNRM*NORM -PNRM*NORM			EDIT LOWER: 30µA UPPER: 30.0mA WAIT : OFF TIMER : 1s

B	NTWK	MODE R1:	10 kΩ RANGE	ABORT

[Setting screen for auto tests]

## Capable of saving test results

For independent tests, enables you to save not only test results but also the test date and time and the test conditions for up to 50 tests; for auto tests, you can save this data for up to 50 programs. You can also save the test results as external records using the USB and other interfaces.

### 51 types of standard test conditions are preset

The memory in the main unit is pre-written with 51 types of test conditions for general electrical equipment, which conform to IEC 60990 and the standards listed below. You can set the standard test conditions merely by calling them.

#### [Standards covered by the memory]

Standard No.	Applicable electrical equipment
IEC60950	Information technology equipment
IEC60335	Household and similar electrical appliances
IEC60065	Audio, video and similar electronic apparatus
IEC60745	Hand-held motor-operated electric tools
IEC60598	Luminaires
IEC61010	Electrical equipment for measurement, control, and laboratory use
Electrical Appliance and Material Safety Law	Electrical appliances
IEC61029	Transportable motor-operated electric tools

## Lets you manage the calibration time limit

You can set a calibration time limit in the tester, such that when this time limit is exceeded, a warning message appears or the use of the tester is restricted. This is a new feature whereby the tester itself conducts calibration management.

#### USB interface provided as standard

In addition to the SIGNAL I/O, GPIB, and RS-232C interfaces, a USB interface is also provided as standard.

#### Range of other functions

- "MAX function," which retains the largest current measured.
- "CONV function," which converts the measured current value into the corresponding value for the preset power voltage.
- "SELV function," which causes the DANGER lamp to turn ON if a preset safety extra low voltage (SELV) is exceeded in meter measurement mode.
- "CHECK function," which performs selfanalysis of the measurement circuit networks.

### Options

Test probe [HP21-TOS]

## **Specifications**

Measurenn	ant itam		ament mode
		measur	ement mode 3 types, namely, touch current (TC) measurement, protective conductor
Measurem	ent item		current (PCC) measurement, and METER
	тс		Measure the voltage drop across the reference resistor, using a measurement circuit network (NTWK), and then calculate the current.
Measurement method	PCC		Measure the voltage drop across the reference resistor connected to the
menod	METER		protective earth wire, and then calculate the current. Measure the voltage and current using the measurement terminals.
METER Measurement mode			DC/RMS/PEAK (RMS being the true root-mean-square value)
measurem	Network A		Basic measurement element: $(1.5 \text{ k}\Omega/(0.22 \mu\text{F}) + 500 \Omega$
			(conforming to IEC 60990) Basic measurement element: $(1.5 \text{ k}\Omega//0.22 \mu\text{F}) + 500 \Omega//(10 \text{ k}\Omega + 0.022 \mu\text{F})$
Measurement circuit network (NTWK)	Network B		(conforming to IEC 60990)
	Network C		Basic measurement element: $(1.5 \text{ k}\Omega//0.22 \mu\text{F}) + 500 \Omega//(10 \text{ k}\Omega + (20 \text{ k}\Omega + 6.2 \text{ nF})//9.1 \text{ nF})$ (conforming to IEC 60990)

(Read rdng as set.) ween A and B DC/RMS: 10.000 V to 300.0 V, PEAK: 15.000 V to 430.0 V ±(3% of rdng + 2V), measurement range fixed at AUTO. Approx. 40 MΩ Set the SELV to detect; if this value is exceeded, the DANGER lamp is turned OI 10 V to 99 V, in 1-V steps, OFF function provided. m. memory Setting range: 0 s to 999 s, accuracy: ±(100 ppm of set + 20 ms) Setting range: 1 s to 999 s/OFF function, accuracy: ±(100 ppm of set + 20 ms) Setting range: 1 s to 999 s/OFF function, accuracy: ±(100 ppm of set + 20 ms) Muto test (MUTO): Automatic execution of up to 100 steps (test conditions) Independent test (MANUAL): Independent execution of the Seaved. MANUAL: Up to 100 sequence programs can be saved.

Other fur				
Measure		Converts the measured current value into the corresponding value at the preset power voltage		
conversio	on (CONV)	Setting range: 80.0 V to 300.0 V, OFF function provided.		
		Selects a measured value from those below.		
MEASURE MODE		NORM: Displays the measured value in the measurement period.		
		MAX: Displays the largest measured value in the measurement period.		
Power positive/negative phase selection (POL)		NORM: Positive phase connection, REVS: Negative phase connection		
Single fault selection (COND)		NORM: Normal, FLTNEU: Disconnection of the neutral wire, FLTPE: Disconnection of the protective earth wire		
Earth ch	eck	Generates CONTACTFAIL if the enclosure is grounded in a TC (EncLiv, EncNeu) test		
	RE CHECK	Checks the measurement function between measurement terminals A and B, and places the tester in the PROTECTION state if an error is detected.		
Power volt	age measurement	Measurement range: 80.0 V to 250.0 V, resolution: 0.1 V, accuracy: ±(3% of rdng + 1 V)		
	ent measurement	Measurement range: 0.1 A to 15.00 A, resolution: 0.1 A, accuracy: ±(5% of rdng + 1 V)		
		Measurement range: 0.1 A to 15.00 A, resolution: 0.01 A, accuracy: ±(5% of rang + 30 mA Measurement range: 10 W to 1500 W		
Power m (effective	easurement			
GUBCUVE	,	Accuracy (at a power voltage of 80 V or higher and a load power factor of 1): ±(5% of rdng + 8 W		
0	Recording	Items: Calibration date and time, test date and time, permissible date and time: Up to 2099		
System	Calibration time	Enables the setting of a calibration time limit. Once this time has passed, a warning is output at power or		
clock	limit management (CAL PROTECT)	OFF: Displays warning.		
Protectiv	e operation	Relay operation error, overload, over range, measurement function check, failure of internal battery, etc		
Interface				
RS-2320		D-Sub 9-pin connector (conforming to EIA-232D), baud rate: 9600/19200/38400 bp		
	,	(For connection to a PC, use a "9-pin female-female reverse" cable.)		
GPIB		Conforms to IEEE Std. 488-1978. (SH1,AH1,T6,TE0,L4,LE0,SR1,PP0,DC1,DT0,C0,E1)		
USB		USB Specification2.0		
REMOTE		6-pin MINIDIN connector (for HP21-TOS (separately sold option) only)		
SIGNAL	I/O	25-pin D-Sub connector		
General				
	Rated voltage/	Terminale A to B: 050 ) ( terminal to abaseis: 050 ) ( 400 m A		
Measurement	current	Terminals A to B: 250 V, terminal to chassis: 250 V, 100 mA		
terminals	Measurement category	CAT II		
	Effective terminal display	Terminals effective to measurement are indicated with LED lamps.		
	Specification assured range	Temperature: 5°C to 35°C, humidity: 20% rh to 80% rh (no condensation)		
		Temperature: 0°C to 40°C, humidity: 20% rh to 80% rh (no condensation)		
Environment	Storage range	Temperature: -20°C to 70°C, humidity: 90% rh or less (no condensation)		
	Mounting location			
	Input power	Input voltage: 85 Vac to 250 Vac, frequency: 50/60 Hz, power consumption: 70 VA max		
Power	AC LINE (for EUT)	Rated output capacity: 1500 VA, maximum current: 15 A, rush current: 70 A peak max. (within 20 ms		
Insulation resistance		The output capacity for VK maximum comment. To A, rust current, for peak maximum comments of $M_{\rm C}$ and $M_{\rm C}$ or greater (500 Vdc) (between AC line and chassis, between measurement terminal and chassis)		
Withstand voltage		1390 Vac, 2 seconds/20 mA or less (between AC line and chassis)		
Earth co		25 Aac/0.1 $\Omega$ or less		
	,	Conforms to the requirements of the directive and standard below.		
Safety (*1)		Low Voltage Directive 73/23/ECC, EN61010-1 (Class I, Pollution degree 2)		
Electromagnetic compatibility (*1, *2)		Conforms to the requirements of the directive and standard below. EMC Directive 89/336/ECC, EN61326, EN61000-3-2, EN61000-3-3 Applicable conditions: All cables and wires used to connect to this product mus be shorter than 3 meters. Use the supplied test leads.		
Outside di	mensions, weight			
Accessories		1 set of test leads (TL21-TOS: red and black, one each, with alligator clips) 1 flat probe (FP01-TOS), 1 spare fuse (15A, for EUT power) 1 instruction manual, 1 circuit principle diagram sticker 2 power cords (for the tester and for the EUT AC line)		

#### [External dimensional drawings]

Πæ

Product name/ model name	Flat probe FP01-TOS (equivalent to the supplied probe)
	Test probe HP21-TOS (with a start switch)
	Multi-output OT01-TOS (allows the connection of the different plugs used around the world)
	Rack mount bracket KRA3-TOS (inch type)
	Rack mount bracket KRA150-TOS (millimeter type)
